### Quenched linear response for random systems with a nonuniform decay of correlations

University of Rijeka

**Abstract:** We will discuss quenched and annealed linear response results for broad classes of random dynamical systems with a nonuniform expansion. The talk will be based on joint works with P. Giulietti, J. Sedro and Y. Hafouta.

- **Dia:** 16 de Maio de 2024;
- **Local:** Sala de Reuniões, Departamento de Matemática, UBI, 14h30min.
